* P Source : MAP = Monoammonium phosphate DAP = Diammonium phosphate

"I think the uniformity is a big factor and I think when you decide

what rate you're going to put down you know what you're getting. It's easy to get it locked in, it melts down and it's harder and harder in this business to be able to do that with the amount of golf that we're all under pressure to play. We don't have big windows like we used to where we have a day off."

- John Zimmers, Superintendent,
Oakmont Country Club, Oakmont, PA, U.S.A.

NutriDG™

DISPERSING GRANULE TECHNOLOGY

THE NEXT GENERATION
OF TURF NUTRITION

0 2.5 cm

28 Nutri DG Particles
per 2.5 cm² are
Applied ON the Turf

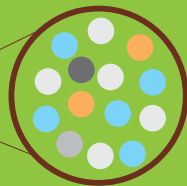

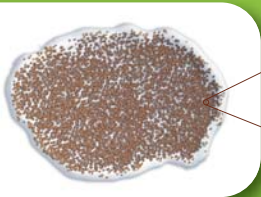

0 2.5 cm

670,000 Nutrient Particles
per 2.5 cm² are
Dispersed INTO the Soil.

Nutri DG is Watered In and Rapidly
Disperses Within Minutes

DISPERSIBILITY... IT'S WHAT MAKES NUTRI DG UNIQUE

- N
- P
- K
- Fe
- Mn

When watered, each particle of Nutri DG quickly dissolves into approximately 24,000 microscopic, turf-penetrating particles. You're assured that plant nutrients get through the turf canopy and into the soil and roots. With Nutri DG, chances of particle run off or collection at low points are completely eliminated.

NUTRI DG DISSOLVES 100% INTO YOUR TURF

Since Nutri DG quickly disperses through the turf, your mower will no longer be picking up nutrients along with the turf clippings. Golfers will not be walking off with fertilizer on their shoes or having particles stick to golf balls. Unlike other granular fertilizers, you get all of what you pay for with Nutri DG.

NO BALL PICKUP

NO MOWER PICKUP

NO SHOE PICKUP

Give your Pro Shop something to cheer about...more times for player bookings and happier player experiences. Why not order Nutri DG today? For the location of your local Andersons distributor, visit www.NutriDG.com.
